

We are happy to introduce the new Pre-fix Quickbond & Instant Marker Set.

This new version will be sold next to the classic Pre-fix and will be officially launched in the second week of September.

Pre-fix is a 2 component glue method that is used for **temporary fixing** of a Glushu or other glue-on shoes in order to apply the actual Shubond glue while the horse is standing on 4 legs, which gives both horse and farrier a more comfortable feeling. It can also be used when applying a pad or mesh, or even for **temporarily fixing** unclipped horseshoes before nailing.

Advantages of the new Pre-fix Quickbond set:

- 3 x 50cc CA glue bottles prevent nozzle blockage
- Instant marker works without disturbing sound for the horse
- Can be used with or without the instant marker
 - Curing time without marker: 5 –10 sec
 - Curing time with marker: 1 sec

Can be shipped by airfreight to overseas regions
